PROFESSIONAL SUMMARY

Software Engineering undergraduate at the University of Kelaniya with a strong academic record (GPA: 3.67/4.00) and hands-on experience in full-stack web development. Proficient in designing, developing, and deploying real-world applications using Spring Boot, React.js, Node.js, Express.js, RESTful APIs, MySQL, and MongoDB. Skilled in Object-Oriented Programming (OOP), SOLID principles, Data Structures and Algorithms, and Git/GitHub version control within Agile team environments. Adept at working independently and collaboratively, with a strong commitment to clean, maintainable code and problem-solving. Currently seeking a Software Engineering internship to apply and further develop these skills in a production environment.

EDUCATION

B.Sc. (Hons) in Software Engineering

2024 – Present

University of Kelaniya, Sri Lanka

Current GPA: 3.67/4.00

SKILLS

Programming Languages: Java, JavaScript, C, PHP, HTML, CSS

Frontend Development: React.js, React Native, Tailwind CSS

Backend Development: Spring Boot, Node.js, Express.js, PHP

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, GitHub Actions, Postman, Cloudinary, Vercel, Railway, Figma, Canva

Core Concepts: OOP, DSA, SOLID Principles, REST API Design, CI/CD Pipelines, JWT, OAuth

SOFT SKILLS

Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

PROJECTS

Task Management System (Individual Project)

[Source Code](#)

Full-stack task management application enabling administrators to create and assign tasks to employees, while providing employees with a dedicated interface to view, manage, and track their assigned tasks. The system provides an organized workflow for task assignment, progress tracking, and employee task management.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

AI Interview Coach (Individual Project) | Ongoing

[Source Code](#)

Full-stack AI-powered interview preparation application enabling users to create and manage personalized interview sessions, practice technical and behavioral questions, and track their interview performance. The system provides an organized workflow for interview management, question practice, response evaluation, and progress tracking.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT

Book Fair Stall Reservation System (Group Project)

[Source Code](#)

Full-stack web-based reservation platform designed to facilitate online Book Fair stall booking with secure advance payment processing and QR code-based entry verification. Includes an administrative dashboard for managing bookings, payments, and stall allocations.

Tech Stack: Spring Boot, React, Tailwind CSS, MySQL, ZXing, SMTP

Student Showcase Projects (Group Project)

[Source Code](#)

Full-stack Student Project Showcase Portal enabling students to publish and showcase their projects, recruiters to discover student talent, and administrators to manage project approvals through role-based dashboards. The platform uses secure authentication and provides separate functionality for different user roles.

Tech Stack: React, Node.js, Express.js, MySQL, Google OAuth, JWT, Tailwind CSS
